Description		Total
Clump of three large sequoia trees back left corner of home + small fir next to them: recommend removal to prevent damage to home		6,500.00
NOTES: - these trees have an intensive root system that is known for disturbing concrete and foundation; with the close proximity to the home I believe there is a very high likelihood of the roots being under the home		
ADDITIONAL OPTION: Arborist and TRAQ reports to accompany engineer report - PREPAY AT TIME OF SCHEDULING - PAID 2/27/24		250.00
ADDITIONAL OPTION: chip or haul wood (Tim added 3/6/24)		3,000.00
Grind stumps - large grinder only		1,000.00
NOTE: - customer will remove raised flower beds for equipment access		
ADDITIONAL OPTION: haul shavings to grade (Tim added 3/6/24)		1,500.00

Description	Total
Remove is complete limb and brush removal, cutting larger trunk wood (if any) to approximately 16 – 20” length rounds and leaving rounds of wood at site of removal, unless otherwise noted above. Divots may be left in area. Foreign debris (i.e. concrete, nails, etc) found in tree may prevent R & R from completing removal, although this is rare. If you do not want the rounds of wood, we have a list of people who will pick up wood for free and can provide that list to you upon request. Stump grinding to approximately one to three business days after removal to allow R & R to provide notice to utility companies to mark underground lines. Stump to be ground to approximately 2 – 8” below grade. Shavings are not removed unless otherwise noted above. R & R will not be held responsible for damaging unmarked sprinkler systems and/or other private lines. Payment is due at the time of service. Three options. (1) check or cash to onsite work crew (2) online portal link via emailed invoice or (3) contact office with credit card information. Pre-payment is required if location will be unattended. R & R Notes: Pam 503-363-0009 track lift or bucket truck grapple truck if hauling wood
