7/30/24

253 Gerth Ave NW
Salem, OR 97304

There are multiple large lateral limbs with poor attachments hanging over 4 properties. They are unstable and endanger surrounding structures. There has been significant cutting of ice storm damage that has not helped the health of the tree. The tree is too close to the foundation and is interfering with the foundation. This tree is a high risk and needs to be removed. (Approval Criteria 1)

In addition, the tree needs to be removed so that a fence can be replaced along the property line. The existing fence has been damaged by the tree. (Approval Criteria 2)
