Antonio PLA Narrative 24-119716-PLN

Narrative addressing the processed Property Line Adjustment. **25-102516-PLN**

Our client has been seeking approval of set back adjustments to accommodate his desire to build another residence on his property. We have gone through the process of separate application to obtain adjustments to the setback requirements,

In reviewing the site plan a dotted line dissecting the property was noticed. Title research and tax assessor reviews and maps indicated the property to be a single parcel, but the obvious ambulance had to be settled. So, a Property Line Adjustment application, **24-119715-PLN** was submitted leading to a new single lot plat to permanently confirm single lot status.

Paul,

For The Right Home Solution
