- ☐ Accessibility Ramp
- ☐ Energy Improvements
- ☐ Mechanical Equipment
- ☐ Primary Structure

Will the proposed alteration be visible from any public right-of-way? ☒ Yes ☐ NoProject's Existing Material: Wood & Shake Project's New Material: Cedar & Brick**Project Description**

Briefly provide an overview of the type of work proposed. Describe how it meets the applicable design criteria in SRC Chapter 230. Please attach any additional information (i.e., product specification sheets) that will help staff and the HLC clearly understand the proposed work:

Existing wood steps, railing, and post were rotted. Replaced steps with brick & metal railing. Post replaced and wrapped with boxed out cedar. Rotted half wall replaced w/ brick. Base of house was cedar and had damage from water from slope of soil from sidewall, was replaced w/ brick. South side had wood fence that rotted, replaced with brick and metal railing above. Add metal gate for access and at driveway. This is to contain owners dogs and help with security since house has been broken into. Brick is red, metal railing black, columns cedar/brownish.

The brickwork ties into to other homes in the area, bigger boxed out columns add detail, and the brickwall/ fence adds another design element to the property. All of this and adds to the architectural while maintaining the craftsman style home and property and adds to the neighbourhood look & charm especially to a corner property.
