Wetland/Waterway/Other Water Features

- ☒ There are/may be wetlands, waterways or other water features on the property that are subject to the State Removal-Fill Law based upon a review of wetland maps, the county soil survey and other available information.
- ☒ Local Wetlands Inventory shows wetland, waterway or other water features on the property
- ☒ The county soil survey shows hydric (wet) soils on the property. Hydric soils indicate that there may be wetlands.

Your Activity

- ☒ A state permit will not be required for the proposed project because, based on the submitted site plan, the project avoids impacts to jurisdictional wetlands, waterways, or other waters.

Applicable Oregon Removal-Fill Permit Requirement(s)

- ☒ A state permit is required for 50 cubic yards or more of fill removal or other ground alteration in wetlands, below ordinary high water of waterways, within other waters of the state, or below highest measured tide.

DSL Review

Wetland Ecologist Comments

There is an existing wetland delineation for this site (DSL file WD2022-0506), which was approved 1/25/2023 and expires 1/25/2028. It appears from the site plan that the proposed project avoids impacts to the wetlands as mapped in aforementioned report. Therefore, no permitting should be required from DSL.

This is a preliminary jurisdictional determination and is advisory only.

This report is for the State Removal-Fill law only. City or County permits may be required for the proposed activity.

Contact Information

For information on permitting, use of a state-owned water, wetland determination or delineation report requirements please contact the respective DSL Aquatic Resource, Proprietary or Jurisdiction Coordinator for the site county.
