Hi Tina,

We have an InActive property record for 1705 22nd St SE which we should be able to revive.
I've updated the address map to reflect the existing address being used and have flipped the lot numbers.
If this aligns with the needs of your project, please confirm so I can proceed with submitting to our IT Dept for processing.

Thank you,

Mareva Massey

Hi Mareva, how weird.

Is there any way we could keep/use 1705 22nd Ave St SE, Salem, OR 97302 and flip the lot numbers? Our substation was built first and the batter storage is section. Our internal GIS, vendors & Google maps have been using the 1705 address for a while.

If not, we can make the other work.

Please let me know.

Thanks for your time.

Kindest regards, Tina

Hi Tina,

At this time, our records aren't showing that there is an existing address associated with this taxlot (073W35AC01700). What is the current address being used? *(If viable, and may be able to use that address instead of my proposed address)*

I've attached a proposed address map for your review.

- New Address: 2075 22nd St SE, Lot 1, Lot 2

Please let me know if you have any questions.

Thank you,

Mareva Massey

Hi Aaron & Mareva,

Thank you – I appreciate the help.

I think our biggest concern is the Fire Dept. is looking for an address for the facility.

We could use our current address and add Site A and Site B to each location if a separate address is not possible.

Hi Aaron,

I hope you are doing well.

I had a quick question and was hoping you could help.

What is the process of obtaining a new address for the battery storage site? The current site address is 1705 22nd St. SE, Salem (substation). We were hoping to have one for the substation and a second one for the battery storage.

Please let me know where I should go or if this is allowed.

Thanks,

Tina Tippin

Hi Tina,

I checked in with Laurel and Robin. We received the application and plans for the Flood Plain Development permit and have created the permit folder in our system (25-102597-FD), we have an in-date of November 27, 2024. It appears the criteria are met for a complete application, what is still needed is payment of application fees and submittal of civil site work permits.

Please let me know if you have any questions.

Aaron Panko
