TO: CHRIS G.
RE: D&O BOONE ROAD

Chris -

Enclosed for your review is a revised site plan for the D&O Boone Road project. Revisions to this site plan include:

- The setback buffer along the west line is 30' and includes the stormwater infiltration area. This eliminates the need for an Adjustment to reduce the setback adjoining residential land.
- The setback buffer along the south line, adjacent to Kuebler Blvd., is reduced to 6'. I am working on an Adjustment for the reduction to that setback.
- The total site landscaping will be less than 15%. I will request an Adjustment for a reduction from the 15% standard.

Please call if you have questions. Thank you.
