Hi. We saw the notices for the 18 unit building(s) to be built. The proposed area shows the land extending to the west fence line of the field. But the other diagram shows it only extending partial way. Can you please let me know what the land use will be for the area west of the apartment building? I believe it is zoned for single family use only. Not multi family. Your response would be greatly appreciated as my street (Flairstone) could possibly be a through street and I need to be aware of what the whole land is going to be used for.

Also, we deal with extreme traffic speeding problems through this 25mph zone. What is the road plans for access to the units? Will there be crosswalks, stop sign, yield light... installed etc?
