Trip Generation Estimate

Street ___

Applicant Name: DevNW	555 Liberty Street SE, Room 325 Telephone: 503-588-6211	Bin # TGE #	
Applicant Name: DevNW Applicant Mailing Address: 212 Main Street, Springfield OR 97477 Location of New Development: 905 & 925 Cottage St NE, Salem, Oregon (Please provide street address. If unknown, provide approximate address and geographical description/inearest cross streets.) Description and Size of New Development: No new development proposed, applicant requests Zone Change (e.g., 150 single-family homes, 20,000 sq. ft. office addition, 12-pump gas station, 50-student day care, additional parking, etc.) Description and Size of Existing/Past Development, if any (note whether to remain or be removed): Existing 6,269 SF Religit Assembly and existing 1,978 SF Single-Family Residential buildings to remain. See also Existing Conditions Plan Planning Action Involved, if any: Zone Change and Minor Comprehensive Map Plan Adjustment (e.g., zone change, subdivision, partition, conditional use, PUD, mobile home park, etc.) Section 2 (To be completed by City staff.) Proposed Use Proposed Use Development Quantity: ITE Land Use Code: Trip Generation Rate or Equation: Average Daily Trips: ELNDT Adjustment Factors Trip Length: Trip Length: Trip Length: Transportation Impact Analysis (TIA) Net Increase in Average Daily Trips: (Proposed use minus existing use.) A TIA will be required: (Proposed use minus existing use.) A Transportation Systems Development Charge Net Increase in TSDC Trips: Proposed use minus existing use.) A TSDC will be required. (Proposed use minus existing use.) A TSDC will be required. (Fee determined by Development Services.) Section 4 (To be completed by City staff.) Remarks: Date: CC: Chief Development Services Engineer	Salem, Oregon 97301-3513 11Y: 503-588-6292	Date Received	
Applicant Mailing Address: 212 Main Street, Springfield OR 97477 Location of New Development: 905 & 925 Cottage St NE, Salem, Oregon (Please provide street address. I funknown, provide approximate address and geographical description/inearest cross streets.) Description and Size of New Development: No new development proposed, applicant requests Zone Change (e.g., 150 angle-family homes, 20,000 sq. ft. office addition, 12-pump gas station, 50-student day care, additional parking, etc.) Description and Size of Existing/Past Development, if any (note whether to remain or be removed): Existing 6,269 SF Religit Assembly and existing 1,978 SF Single-Family Residential buildings to remain. Information Required to Assess the Need for a Traffic Impact Analysis and Transportation Systems Development Charge

The following information is required in order to assess the need for a Traffic Impact Analysis (TIA) and to calculate the Transportation Systems Development Charge (TSDC) to be levied on a proposed new development.

TIA Determination:

The City of Salem may require that a TIA be prepared as part of the approval process for major new development. The purpose of a TIA is to estimate the traffic impacts created by a new development on the surrounding street system. Any significantly adverse traffic impacts identified in the TIA must be mitigated by the applicant.

The estimated daily traffic generation of a new development is used as the criteria for determining whether a TIA is needed. If the new development access is located on an arterial or collector and the estimated daily traffic generation is more than 1000 trips, a TIA may be required. If access is located on a local street or alley and the generated trips exceed 200, a TIA may be required. Other criteria such as site access issues, driveway restrictions, and existing facilities deficiencies may also be used, if recommended by City Traffic Engineering staff.

The City Traffic Engineer makes the determination as to whether a TIA is required. (For more information on TIA criteria, see Development Bulletin No. 19 dated January 20, 1995.) When the determination has been made, copies of the Trip Generation Estimate form are sent to Public Works Development Services Division and the applicant. If a planning action is required, a copy is also forwarded to the Community Development Department.

TSDC Analysis:

The City of Salem charges a TSDC on all new development that creates a net increase in traffic on the surrounding street system. The total charge is assessed on a per trip fee times the TSDC trips calculated for the development. For more information on the TSDC, see Council Staff Report dated October 9, 1995.

To assist in estimating the daily trips generated by a new development, please answer the questions in Section 1 of this sheet and return it to Room 325 of the Civic Center. If you have any questions, Traffic Engineering staff are available at 503-588-6211. A copy of the completed trip generation estimate will be returned to you at the address provided in Section 1.

No Land Use, Planning, or Development Approval applications requiring Trip Generation Estimates will be processed until this information has been provided and the TIA/TSDC assessment has been made by City Traffic Engineering staff.
