Hi Steve,

The street amenities in the slope and utility easement are acceptable to ODOT as long as nothing is permanently installed. Thanks for reaching out.

Casey Knecht, P.E.

Casey,

Please see the attached. We are working on a new project off of Wallace Road. We are in for Land Use Approval with the City of Salem. The City is requiring that we reach out to ODOT for permission to put the required street amenities in ODOT's easement area. The City requires amenities such as street furniture to make the street frontage more appealing to the pedestrian. No permanent structures will be placed in the ODOT Easement.

If you could respond to this email. We will forward to the City your comments. Thank you.
