Subject: Meyer farm

This area has been a rustic agricultural place since its creation. The developer is just in its development for the money as the development planned would be a tremendous financial boon. I am sure the city is also eyeing the property taxes it would bring in. The trees should be preserved and the area should remain pastoral as a park. I have viewed this property since the 1970's and have always been awestruck that an area like this exists so close to such a developed area of the city. I enjoyed watching several horses graze in the field. It is a gem that shouldn't be destroyed. Thank you for considering my viewpoint.
