COMMENTS: Cherriots supports the pedestrian and roadway infrastructure included in the submitted plans. However, we request that a new street tree not be planted in the location indicated on the screenshot on page 2 of this comment form. A tree planted in the indicated location would block the line-of-sight for bus operators approaching the bus stop at this location, increasing the possibility for passengers to be missed as they are waiting for the bus. This request stems from a lesson learned with new street trees the County planted on Aumsville Highway that have been a line-of-sight issue for the past several years because the trees were too young to be trimmed.
