

## **TREE CONSERVATION/REMOVAL PLAN**

There are 38 trees located within the boundary of the site. All 38 trees are designated for preservation. Due to the layout of the lots and the riparian corridor, the removal of trees on the site is not necessary at this time.

Waln Creek runs through the subject property. The riparian corridor has been identified on the site plans and all trees within the riparian corridor will be preserved.

There are no Oregon White Oaks located throughout the site. All trees on the site are identified as Fir trees, Poplar trees, Elm trees, Alder trees, Ash trees, Maple trees, Cotton trees, Birch trees, and Walnut trees. There are no significant or heritage trees located on the site.
