RE: 5669 Commercial Street – GSI Summary

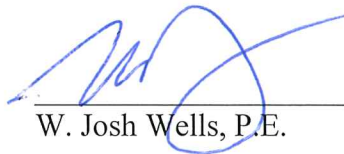

Dear Hugo,

Westech Engineering has complete the stormwater design of the 5669 Commercial Street which included 1.01 acres of impervious surface, which was slightly more than what was shown on the plans to be conservative. The recent site plan changes have resulted in a new impervious area of 1.00 acres of impervious surface for the entire site. Therefore, the design as approved still meets the City stormwater and GSI requirements.

If you have any questions or need additional information regarding this matter, please contact us at (503) 585-2474.

Sincerely,

WESTECH ENGINEERING, INC.

W. Josh Wells, P.E.
