To whom it may concern,

Please do not develop this property. Adjusting the property line will do nothing to improve this proposal for development. It is just an all around bad idea.

This project should have never been approved in the first place. A vote was taken where this did not pass and it should have been left at that. Allowing the developer to alter their plan and then to take another vote should have never happened. Especially when not all council members were present or available for the second vote.

Just deny this project and let the family members settle this matter amongst themselves.

It's not going to do one thing to help improve the livability of Salem. There are much bigger issues to solve within the City of Salem. How about starting with the homelessness and all of the crime and garbage that has come along with it. The city of Salem is a big pigsty.

Thank you,
